How to **Download** Footprint & 3D

Description: In this document I will introduce some websites in order to easily download the footprint and 3D of the components used in Altium Designer. Furthermore, I will show how to use them in practice visually.

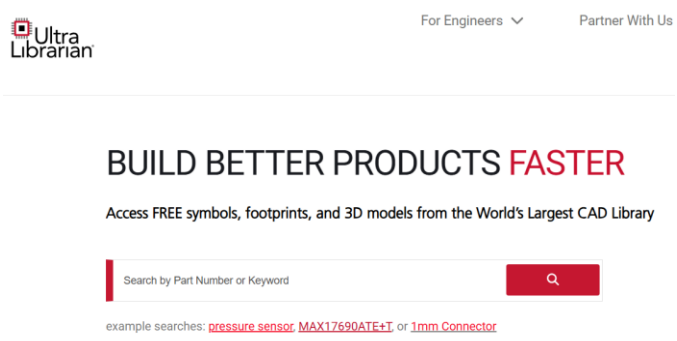

Method 1:

Google: Download ___Device Name__OR___Foot Print Name____ PCB Foot Print

Example: Download DFSL00-7 PCB Foot Print

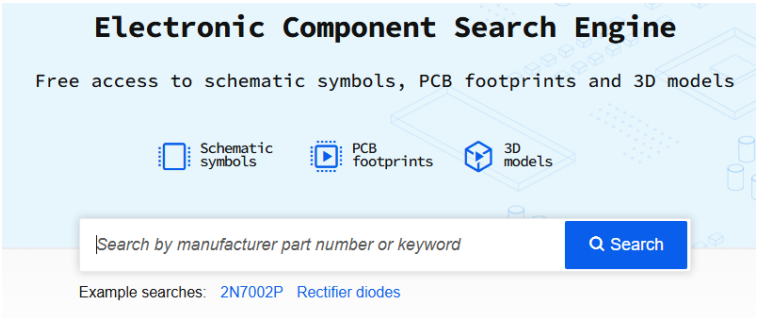

Method 2:

Go to this Website: www.ultralibrarian.com => write the part number of component in search.

Method 4:

Go to: https://componentsearchengine.com/ => write the part number of component in search.

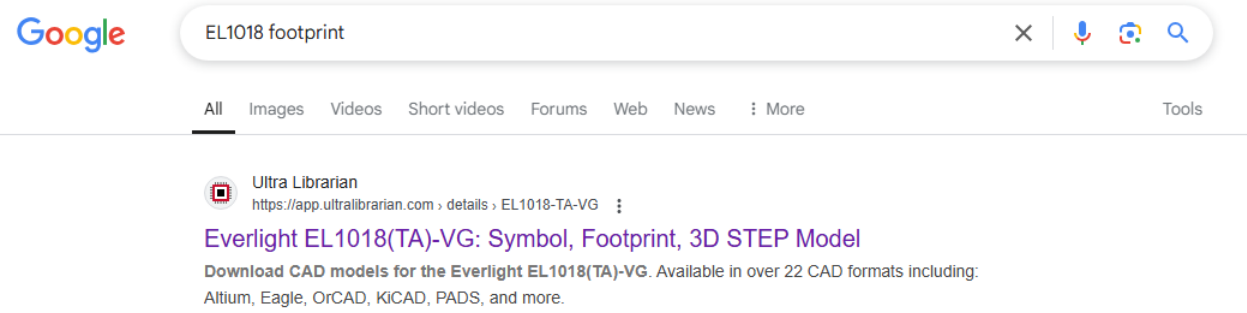

Method 3:

Go to: www.snapeda.com and just register with your email address and verify your email

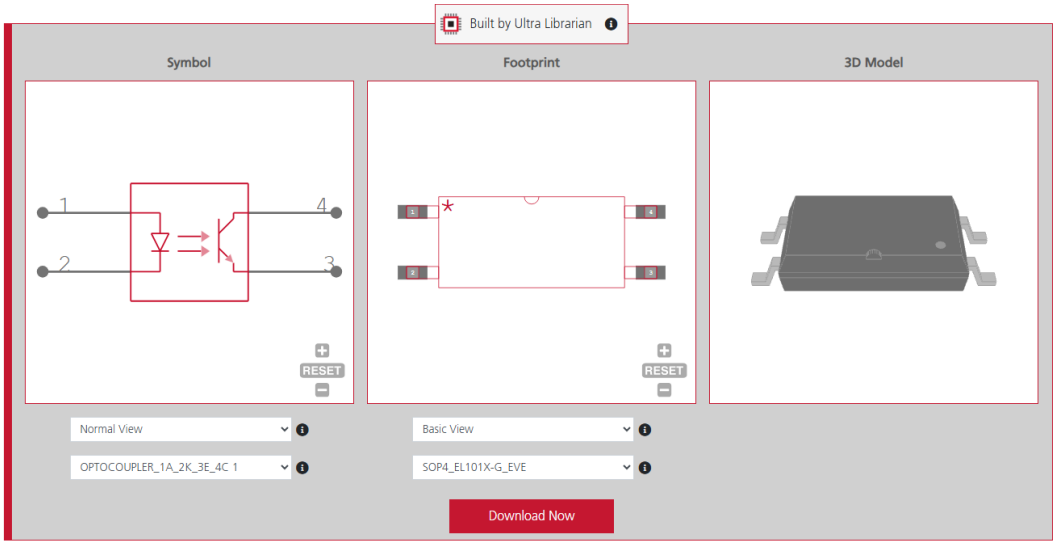

Important Tip: Always recheck the size of the Downloaded Foot Print with the datasheet

Complete Guide: How to download footprint and 3D from **UltraLibrarian** (8 steps)

Step 1:

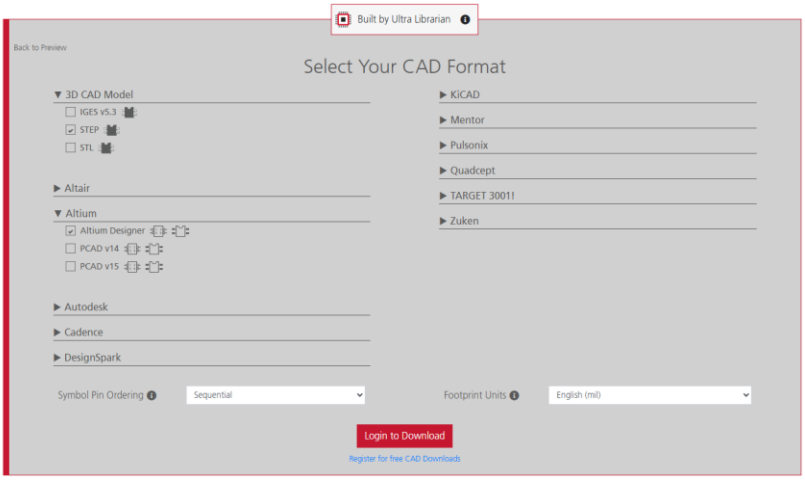

Step 2:

Ref: https://app.ultralibrarian.com/details/8636caa6-84cd-11ee-b2d2-0ae0a3b49db5/Everlight/EL1018-TA-VG

Step 3: in 3D CAD Model tik STEP. In Altium Tik Altim Designer

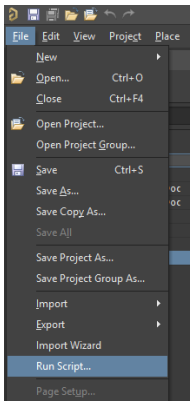

Step 4: After log in to your account download the file below:

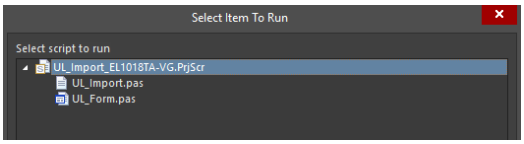

Step 5: Unzip the file as follows:

AltiumDesigner	3/9/2025 10:01 AM	File folder	
ImportGuides.html	3/9/2025 5:59 AM	HTML File	8 KB
readme.txt	2/11/2025 7:01 PM	Text Document	2 KB
SOP4_EL101X-G_EVE.step	3/9/2025 5:59 AM	STEP File	86 KB
ul_EL1018-TA-VG.zip	3/9/2025 9:30 AM	WinRAR ZIP archive	58 KB

Step 6: Open Altium Designer and Choose **File** > **Run Script**

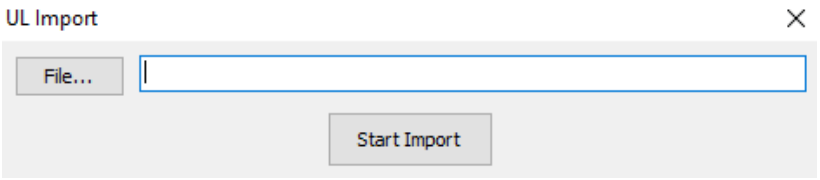

Step 7: Select **Browse** > **From File…** and select the downloaded **UL_Import_EL1018TA-VG.PrjScr**

Note: This script is included in the download from Ultra Librarian and is located in the AltiumDesigner folder.

Step 8:

8.1. In the UL Import Dialog box, select **File**

8.2. Select the .**txt** file and **Open**.

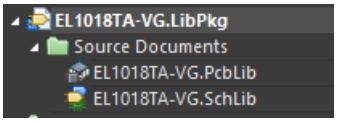

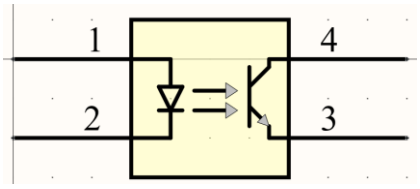

Note: This file is included in the download from Ultra Librarian and is located in the Altium Designer Folder. The naming convention of this file will differ depending on the download method.

8.3. Select **Start Import**.

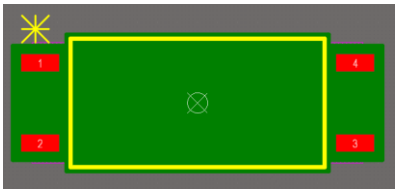

*Note: A dialog box may appear regarding the text font of the symbol. Click **OK**.*

The PCB footprint and schematic symbol have been generated and can be viewed with selection in the project window.
