Shortcut Keys in Altium Designer

Summary: Knowing and using Altium Designer shortcuts effectively can make a huge difference in the productivity and efficiency of an electronics design engineer. These are the most commonly shortcut keys that I used in my designs, by the way there are numerous shortcuts which I share the other document on my github.

Schematic

Keys	Explanation
Ctrl + W	Draw a Wire
V + G + S	Set the Grid Size Before Drawing a Schematic
E + G + G	Left Click & then hit E G G to align grid size after drawing
Y	While placing an object to flip it along the Y-axis
X	While placing an object to flip it along the X-axis
T + D	Check if there is any Error or Warning related to Connections
C + C	Check the warnings and errors

PCB

Keys	Explanation
L	Flip component being moved to other side of board
E + P	Set the Reference
J + C	Look for a component
Ctrl + M	Draw a ruler
V, F	Fit Board
V, B	Flip board horizontally about cursor position
T O C	After choosing a device in schematic => Reposition Selected Components
+ -	Changing the Layers
Ctrl + Shift + L	Align left
Ctrl + Shift + R	Align right
Ctrl + Shift + B	Align bottom
Ctrl + Shift + T	Align top
Ctrl + Shift + H	Align horizontally
Ctrl + Shift + V	Align vertically
